

HYDRAULIC CONCRETE PILE CRUSHER & PILE BREAKER

Hydraulic Pile Breakers

The hydraulic pile breaker is an advanced, efficient and time-saving system for trimming concrete outcrops and foundation piles.

The pile breaker produces a perfect horizontal pile cutting finish, it doesn't damage the reinforcement or leave cracks below the cut-off level. This efficient pile cutting system is extremely modular, making it easy to adjust to each concrete pile diameter at the site.

The pile breaker is many times faster than the traditional concrete breaking process and is fully automated throughout its operation. The concrete pile breaker is easy to handle and maintain as it doesn't require special skills. This reduces risk costs and extends its service life.

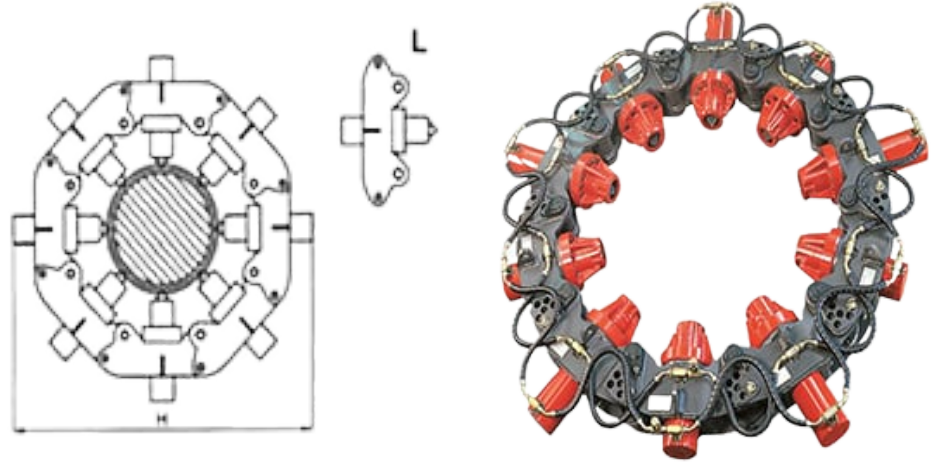

- ▲ Adjustable and maneuverable
- ▲ Safe Chain with CE certification
- ▲ Suitable for different construction requirements
- ▲ Made of cast steel with long service
- ▲ Improved design with drill rods for higher reliability
- ▲ Comes with a unique lifting frame

Model	Unit	PB800
Model Number	modules	6 - 13
Range of Pile Breaker	inch	19" - 79"
Max Force for Single Rod	KN	650
Max Stroke of Hydraulic Cylinder	mm	215
Pressure of Hydraulic Cylinder	Mpa	32 - 35
Max Flow for Single Cylinder	GPM	6.6
Max Height for each crush	mm	≤300
Suitable Carrier	T	20
Single Model Weight	kg	380
ROTATION OIL CAPACITY	kg	3480

Model	Unit	PB800 (Heavy Duty)							
Model Number	modules	6	7	8	9	10	11	12	13
Range of Pile Breaker	inch	19 - 24	25 - 31	33 - 40	41 - 49	50 - 55	57 - 63	65 - 71	73 - 79
Suitable Carrier	T	20	22	26	27	30	32	35	36
Total Pile Breaker Weight	lbs	5100	5900	6834	7600	8500	9300	10000	11000
Height of Single Crush Pile	mm	300	300	300	300	300	300	300	300
